# Power Perfected

The Shuttle SL<sup>AM</sup> is here to shatter the status quo, combining the ultralight, all-mountain enduro versatility of our groundbreaking Switchblade with the electrifying power of a next-level e-bike. This isn't just a bike – it's a game-changer, setting a brand-new standard for what a high-performance eMTB can be. Prepare to ride farther, faster, and harder than ever before, without ever holding back. Get ready to experience the future of mountain biking!

# Lightweight. Powerful. Unstoppable.

The Shuttle SL<sup>AM</sup> redefines what's possible. Thanks to its Bosch Performance Line SX drive system, you get an awe-inspiring 600 watts of peak power, delivering a surge of energy that feels as natural as your own pedal stroke. No extra weight, no compromise. With a lightweight, sleek frame and a 400Wh in-frame battery, the Shuttle SL<sup>AM</sup> is built for unmatched agility—handling technical lines and rough terrain with the kind of precision that'll leave you wondering if there's even a motor at all.

And the best part? It comes in under 40 lbs (18Kg)—yes, you heard that right! This bike blurs the lines between a traditional mountain bike and a powerful e-bike, giving you the best of both worlds: electric boost when you need it, and feather-light handling that makes every ride feel like pure magic.

Geo & Build Specs

# Travel

Pro & Team level builds feature the Fox Factory Float X rear shock providing 150mm of rear travel and a Fox Factory 36mm Grip X2 fork with 160mm of travel up front.

Ride level builds feature the Fox Performance Float rear shock providing 150mm of rear travel and a Fox Performance 36mm Grip fork with 160mm of travel up front.

XS sizes are equipped exclusively with a Fox Float shock, Performance Fox Float on Ride builds and Factory Float on Pro & Team builds.

Fox Neo Air Shock Upgrade available on Pro & Team builds.

# dw-link

The enhanced dw-link suspension delivers an ultra-efficient pedaling response, giving the Shuttle SL<sup>AM</sup> a razor-sharp feel on the climbs and unwavering control on the descents.

dw-link is the perfect suspension platform for Pivot's eMTB's by providing the optimal amount of anti-squat, enabling the Shuttle SL<sup>AM</sup> (and all Pivot Shuttle models) to harness the full power of the drive system, with optimal traction and incredible suspension performance.

# Bosch Performance Line SX Drive System

The Bosch Performance Line SX Drive System delivers a seamless, natural boost with up to 600 watts of peak power and 55Nm of torque.

Lightweight and ultra sleek, the Bosch Performance Line SX Drive System is the lightest and most compact drive unit from Bosch.

# Long Lasting Battery

The Shuttle SL<sup>AM</sup> comes equipped with a 400Wh Battery packed in the downtube.

Compatible with Bosch PowerMore 250 Range Extender.

# New Charging Port Design

Our all-new charging port cover is sleek, seamlessly integrated and incredibly easy to use, ensuring quick, hassle-free access without compromising aesthetics.

Designed in-house for superior durability and a flawless fit, this cover offers better protection from the elements while maintaining the premium look riders expect.

Engineered for flawless compatibility, the cover is removable to accommodate the Bosch PowerMore 250 Range Extender for extended ride time.

# PowerMore 250 Range Extender

The Bosch PowerMore 250 Range Extender (250Wh) is a water-bottle sized additional battery that allows extra power and range for that one last lap, or that last pedal to the truck.

The PowerMore range extender is compatible with all Bosch equipped Shuttle models.

PowerMore 250 Range Extender weighs in at 3.3 lbs (1.5 kg)

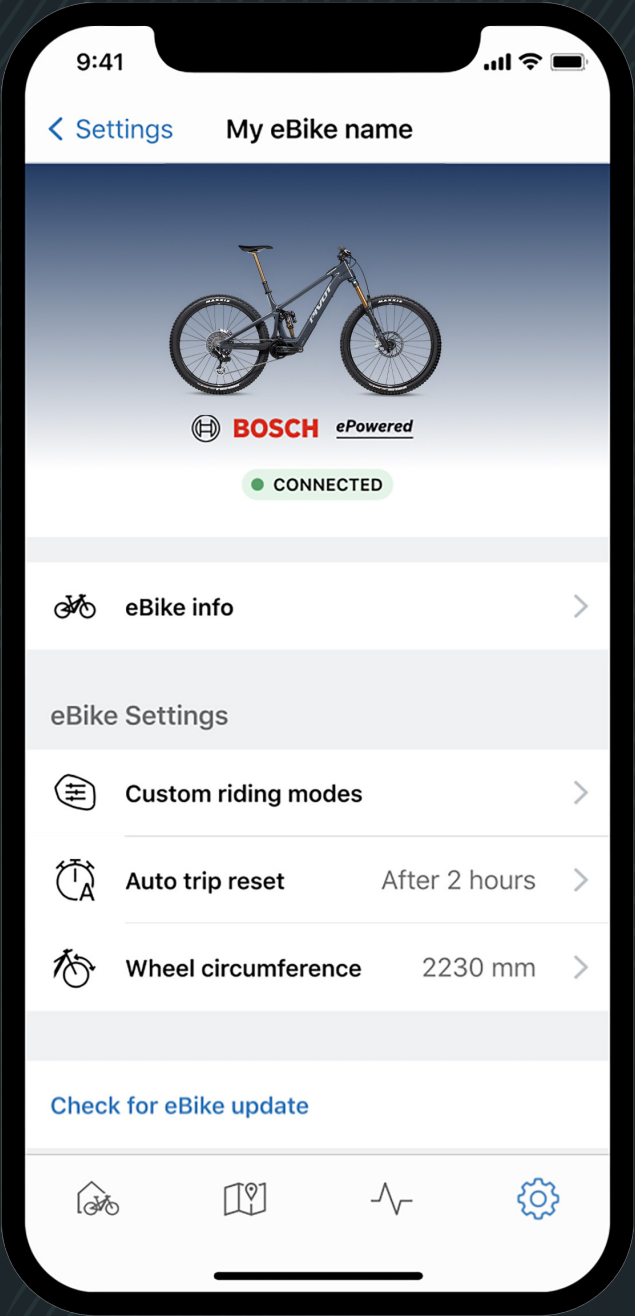

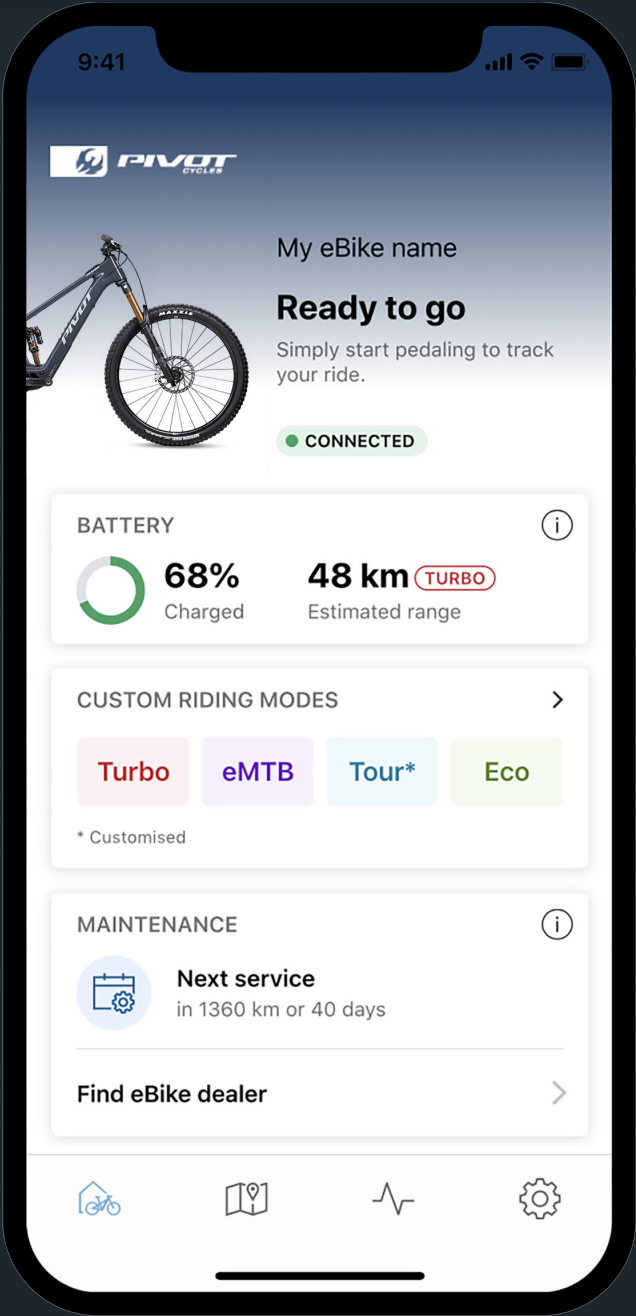

# Bosch x Pivot Flow App

The customized Bosch x Pivot Cycles Flow app is a user-friendly mobile tool that provides seamless connectivity with Bosch-powered e-bikes.

The Bosch x Pivot Cycles Flow app offers features such as recommended maintenance intervals based on mileage, find a Pivot/Bosch dealer, real-time charge percentages and estimated range all in one easy to navigate app.

Your digital garage: add and manage up to six eBikes in one account for streamlined control and convenience.

Customize ride modes and fine-tune support levels to match your preferred on-trail experience.

# Ultra Clean Command Center

The elegant Bosch wireless remote, SRAM wireless shifter (Team and Pro builds) and Phoenix Factory Lock-On grips mounted to our Phoenix Factory Tuned-Flex carbon bar transforms the cockpit into an ultra-clean command center.

# New Cable Port Design

The dual cable port allows for two hoses to be routed through the same port, simplifying cable routing at the head tube both visually and practically.

The larger opening provides an easier and more efficient routing process for your cables.

Increases versatility for custom setups, including moto-style cable routing.

# Expanded Sizing to Accommodate All Riders

For the first time ever, a Pivot e-bike is available in XS – ensuring every rider can experience the power and performance of the Shuttle SL<sup>AM</sup>.

MX wheel configuration (29"/27.5") delivers the perfect balance of agility and control for smaller riders.

# Geo Flip Chip Adjustability

Dial in your Shuttle SL<sup>AM</sup>'s setup with the Pivot Flip Chip. Switch the geometry between 'high' for conquering rocky and technical courses or 'low' for maximum speed and ultimate control on the descents.

The high BB setting will raise the bottom bracket and steepen the head angle by 0.5 degree or allow for the use of a 27.5" rear wheel making all sizes of the SL<sup>AM</sup> mixed wheel compatible.

The XS frame size will only be available in a MX wheel configuration, not compatible with 29" rear wheels.

# Proprietary Ride Tuning

Fits riders 4'11" (150 cm) to 6'4" (193 cm) + with sizes ranging from XS-XL.

Independent strength to weight analysis for each frame achieves consistent performance metrics.

Custom-tuned carbon scales stiffness across all sizes, ensuring optimal ride characteristics for all rider profiles.

For more information regarding Pivot's Proprietary Ride Tuning check out the [journal](#).

# Live Valve Neo

Live Valve Neo takes the already efficient dw-link® platform and makes it even more effective, delivering real-time suspension control for a planted, confident ride.

Built on Neo, the fastest wireless protocol in cycling, Live Valve Neo reacts 100 times faster than Bluetooth for real-time suspension performance across any terrain.

Firm mode delivers a supportive feel on climbs and traverses, opening instantly when the trail gets rough.

Available on Pro & Team Builds.

Want the full story? Read our [journal](#) to learn more about Live Valve Neo.
